Career Objective

Computer Engineering student with hands-on experience in Python, full-stack development, and problem-solving, with a growing interest in AI, Generative AI, and scalable software systems. Passionate about building impactful technology solutions through development, automation, and collaborative innovation.

Summary

Computer Engineering student with hands-on experience in full-stack development, backend engineering, and AI-powered applications. Skilled in Python, Flask, React, Flutter, and REST APIs, with experience building scalable software solutions through internships, hackathons, and research. Strong leadership experience in technical communities, passionate about software engineering, cloud technologies, and applied AI.

Education

B.Tech, Computer Engineering | CCoEW, Nagpur | CGPA: 8.68 | 2024 – Present

HSC, Class 12th | SJC, Nagpur | 72.17% | 2024

SSC, Class 10th | SJC, Nagpur | 84.00% | 2022

Technical Skills

- **Programming:** Python(Proficiency) | C, JavaScript, Dart(Intermediate) | C++, Assembly Language (Familiar)
- **Web Development:** HTML, CSS, Flask (Proficient) | React.js, Bootstrap, Flutter (Intermediate) | Node.js (Familiar)
- **Databases:** MySQL, MongoDB
- **AI & Data:** Basics of Machine Learning and Data Science, Generative AI & Prompt Engineering, Exploratory Data Analysis using Python, REST APIs and AI Tool Integration
- **Tools:** Familiar with Git/GitHub, Firebase, Postman
- **Concepts:** Data Structures & Algorithms, OOP, DBMS

Experience

Software Developer Intern

Ratna Wellness Centre (*Powered by Asclepius Healthcare Solutions*)

April 2026 - July 2026

- Developed a web-based Enterprise Resource Planning (ERP) platform for business operations.
- Built modules for inventory, billing, warehouse management, and user authentication.
- Designed backend APIs, database models, and role-based access control using Flask and SQLAlchemy
- Optimised application performance, tested functionalities, and resolved software issues.
- Tech Stack: Python, Flask, SQLAlchemy, SQLite, HTML, CSS, Bootstrap, JavaScript, Git

Projects

1. Water Quality Detection System for Drinking Water - IoT Mini Project

- Developed an IoT-based water quality monitoring system using ESP32 and sensors to measure drinking water parameters. Implemented monitoring for key indicators like TDS and turbidity, helping detect unsafe water conditions
- Tech Stack: ESP32, TDS Sensor, Turbidity sensor, C/C++, Circuit Design

2. OneCummins - AI-Powered Campus Activity Platform - GDGoC Hackathon | 1st Runner-Up

- Developed a centralised platform enabling students to access ongoing college fests, workshops, hackathons, and campus activities in one place.
- Integrated a Gemini AI-powered chatbot to assist users with activity discovery and event-related queries through conversational interaction.
- Tech Stack: Flutter, Gemini API, Firebase

Leadership & Positions of Responsibility

- President, ISTE Student Chapter – Cummins College of Engineering for Women, Nagpur (2025-2026)
- Technical Support Member, Google Developer Groups on Campus CCoEW, Nagpur (2025-2026)
- Student Representative, Student Grievance Redressal Committee, CCoEW Nagpur (2025–2028)

Significant Achievements

- Best Technophile from Allied Science Department, CCoEW, Nagpur
- 1st Runner-Up - TechSprint Hackathon by Google Developer Group on Campus CCoEW, Nagpur
- 2nd Runner-Up - NASA Space Apps Challenge Hackathon, Nagpur
- 1st Place - Web Design Competition CCoEW, Nagpur

Certifications

- SILVER Medalist in NPTEL's C Programming and Assembly Language from IIT Madras
- ELITE in NPTEL's The Joy of Computing using Python from IIT Madras
- ELITE in NPTEL's Programming using Generative AI from IIT Madras
- NPTEL's Programming, Data Structures and Algorithms using Python from IIT Madras
- AI-Powered Security using HCL AppScan by HCL Software
- Smarter Automation with AI-enabled Testing using HCL DevOps Test by HCL Software

Patent & Publications

Published Patents

1. A System for Automated Tank Level Monitoring and Pump Control (Application No.: 202421069594).
2. IoT Based Smart Exhaust System for Monitoring and Controlling Indoor Air Quality (Application No.: 202521088472).

Research Paper

1. Implementation of Lean Manufacturing Principles in Small-Scale Bakeries: A Review and Case Study (Under Publication)

Extra-Curricular Activities

- Delivered a keynote address at the Student Induction Program for newly admitted students.
- Conducted a mentoring session on Course beyond Syllabus for peers.
- Conducted a Web Backend Development Workshop for college students covering APIs, Flask/Node.js backend fundamentals, and REST architecture.
- Presented project to the NBA Committee during the accreditation visit.

Community Services

- NSS Volunteer - Participated in community service, awareness drives and Camps.
- Volunteered with Avabodh Foundation and Abhinav Foundation for NGO initiatives.
